

Program Information

Application Deadline
:: January 15

Program Contact
:: Kendra Bigsby, MPH
Assistant Director
kendra.bigsby@colostate.edu

Program Competencies
:: Assess the public health threat of emerging issues to animal and human populations and identify intervention strategies
:: Incorporate the principles of safe and secure food systems into public health problem solving
:: Analyze how social, political and cultural differences can impact public perceptions about how humans, environmental, and animal interactions affect public health, social well-being, and environmental health

MPH | Animals, People & the Environment Colorado State University | Fort Collins, CO

The concentration in Animals, People, & the Environment supports the One Health concept of collaboration across disciplines for the health of humans, animals, and the world in which we live. This 42 credit hour Master of Public Health program will teach you about food safety, infectious and zoonotic diseases, agriculture, and communications, with the purpose of developing sustainable solutions to unique public health issues that arise from human interaction with wildlife, agriculture, and the environment.

Curriculum	Credits
MPH Core Courses	17
Food Safety Courses	2 (min)
Health Communications Courses	3 (min)
Animals, People & the Environment Courses	5 (min)
Animals, People & the Environment Electives	5 (min)
