

Program Information

MPH | Global Health & Health Disparities Colorado State University | Fort Collins, CO

Application Deadline

:: January 15

Program Contact

:: Kendra Bigsby, MPH
Assistant Director
kendra.bigsby@colostate.edu

Program Competencies

- :: Apply social, behavioral and cultural theory to analyze determinants and correlates of global health problems
- :: Assess how social, behavioral, environmental, cultural, and biological factors contribute to global health outcomes
- :: Incorporate the impacts of gender, race, poverty, history, and culture in the design and assessment of disparity-related interventions
- :: Analyze the impact of global trends and interdependencies on problems related to public health

Globalization has changed the way governments and non-governmental organizations approach challenging issues like HIV/AIDS prevention, the spread of communicable disease, malnutrition, the diabetes epidemic and access to basic medical care. At the Colorado School of Public Health, you can tackle these issues and make a difference in both individual and community health by pursuing a Master of Public Health in Global Health and Health Disparities.

This 42 credit hour program is located on the Colorado State University campus. The curriculum—designed for students who intend to study, identify, and solve local and global public health problems—combines the School's core public health curriculum with faculty expertise in the social, economic, and cultural components of health and health disparities.
