

Program Information

MPH | Health Communication Colorado State University | Fort Collins, CO

Application Deadline

:: January 15

Program Contact

:: Kendra Bigsby, MPH

Assistant Director

kendra.bigsby@colostate.edu

Program Competencies

:: Analyze the influences of social, organizational, and individual factors on the use of information technology by end users

:: Apply theory and strategy-based communication principles across different settings

:: Apply basic skills of message production and delivery for a target audience, which can be employed in a communication-based public health intervention

:: Apply quantitative and qualitative social science research methods to interpret published communication research

Communication is a necessary element in all domains of health promotion and is required to effectively engage, support, and influence individuals, communities, health care professionals and policy makers to become champions for health.

The 42 credit hour Master of Public Health in Health Communication at the Colorado State University campus will prepare you to employ scientifically based communication strategies with the goal of improving health on both the individual and community levels. You will learn to create effective communication strategies that prevent disease, promote health, influence health policies and enhance quality of life.
